PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Machine Learning, Data Science, and full-stack AI deployment. Demonstrated expertise in training predictive models and engineering scalable backend infrastructures to serve them. Strong foundation in algorithmic problem-solving with a track record of developing end-to-end commercial applications and educational technology platforms.

EDUCATION

National University of Computer and Emerging Sciences (FAST-NUCES)	Karachi, PK
Bachelor of Science in Computer Science (BSCS)	Aug 2022 – May 2026

KEY PROJECTS

PRISM (Automated Educational Video Generation) — GitHub — *Python, FastAPI, PHP, Redis, Docker, Manim*

- **Created a software tool that automatically converts plain educational text into fully animated, synchronized instructional videos.**
- Developed a full-stack platform featuring a fully deployed PHP web application interface for user interactions and prompt management.
- Engineered an asynchronous backend using FastAPI and Redis to schedule rendering tasks, currently spearheading dataset building and LLM fine-tuning phases for enhanced instructional accuracy.

Potato Leaf Disease Classification — GitHub — *TensorFlow, Keras, FastAPI, React*

- **Built an AI-powered diagnostic system that analyzes photos of potato leaves to instantly detect and identify crop diseases.**
- Developed and trained a Convolutional Neural Network (CNN) to diagnose Early and Late Blight, achieving a highly accurate 94% diagnostic success rate.
- Deployed the trained machine learning model through a responsive FastAPI backend, delivering real-time predictions with statistical confidence scores.
- Built an interactive React.js frontend, optimizing model inference time and image preprocessing to ensure low-latency user feedback.

Inam Motors Mobile Application — *Flutter, Dart*

- **Developed a complete desktop application for a local auto showroom to digitally manage and display their real-time car inventory.**
- Architected the commercial application from scratch utilizing the Flutter framework for iOS and Android cross-platform compatibility.
- Developed responsive UI components and transitioned prototypes into robust backend integration for seamless daily operational tracking.

TECHNICAL SKILLS

Languages & Core: Python, C++, Dart, JS/TS, PHP, Data Structures, Algorithms (50+ LeetCode)

AI & ML: TensorFlow, Keras, OpenCV, MediaPipe, LLMs

Frameworks & Tools: FastAPI, Docker, Redis, React.js, Flutter, Git, Manim

EXPERIENCE

Front End Development Intern — Digitz Software Agency	June 2023 – Aug 2023
--	----------------------

- Collaborated directly with design and development teams to translate UI/UX wireframes into interactive, production-ready web components.
- Optimized front-end rendering performance and ensured strict cross-browser compatibility for client-facing web applications.
